

Summer Party Hostesses Treated Royally

Host a party, or have your own catalogue party this July or August and earn the **Norwex Antibacterial Mop** for **FREE**. A great value gift simply for sharing the Norwex product line with friends and family.

Product Profile

Norwex Antibacterial Mops Systems

Did you ever wonder how our floors can come clean when we use a rag or sponge mop to do the job and then wring it out in its own dirty water? Tired of having to rinse the floor to ensure our children and pets are safe from the chemical cleansers in our water or on the disposable mop pads? There is a better system for cleaning floors, walls and windows, read on!

The **Norwex Antibacterial Mop Systems** come complete with a handle, base, wet mop pad and dry mop pad. Start by dusting your floors with the dry mop pad to pick up dust, pet hair and more. The antibacterial microfiber wet mop pad cleans with the same great microfiber technology that our Enviro Cloths use. Easy cleaning with just water and microfiber and you have the added comfort of knowing that the silver within the microfiber kills any bacteria collected.

The Norwex Mop System is quick and easy to use and extremely effective. Just ask anyone who already owns this mop and they'll say "I love my Norwex Mop". Strange reply but true because this mop makes cleaning floors a breeze with no replacement pads required!

There are two mop package options to choose from – the Mop Starter Package and the Superior Mop Starter Package. The Superior Mop Package has both wet and dry microfiber pads, whereas the Mop Starter Package contains a polyester dry mop pad and microfiber wet mop pad. There are also two sizes of mops to choose from.
